

Behavioral Health

-our integrated approach-

Health Options believes in the integration of mental health, substance use disorder, and primary care services as the most effective approach to caring for Members with multiple healthcare needs.

We partner with healthcare providers and mental health and substance use disorder specialists to ensure timely access to preventive care services, tobacco cessation benefits, lifestyle modification, and care management of chronic conditions.

Our network of mental health providers and substance use disorder specialists are available to see Members when they need them most.

Many of our plans provide coverage for you to see an in-network behavioral health provider with no out-of-pocket costs for the first three outpatient visits each year.*

Plans provide benefits for inpatient, outpatient, and day treatment program services for mental health and substance use disorders when you receive them from an in-network provider. When choosing your providers and treatment facilities, it is best to stay as close to your community as possible, so that your supports are near you when you need them. Benefits, cost-sharing, and a care management approach are the same for behavioral health services as for other medical or surgical coverage.

Promoting health and wellness is integral to a whole-person approach to care.

While we offer resources to support a wide array of lifestyle challenges, we place a high priority on tobacco cessation, supporting unlimited tobacco cessation attempts.

Expanded Access

We understand accessing mental health/substance abuse support can be challenging. Starting in 2019, we will offer telephonic and video services to assist in improving this access.

Health Options makes it easier for individuals who are thinking about, or are ready to quit smoking or using tobacco products.

We offer an enhanced benefit for over-the-counter nicotine replacement therapy (NRT) products, including nicotine patches, gum, lozenges, and certain FDA-approved medications listed on our drug formulary when prescribed by a provider.

We understand that Members value services provided within their own communities. Health Options is committed to working closely with your local, in-network providers and their care management teams (nurses, social workers, and other healthcare professionals) who know how to best access community resources.
