

HSA Preventive Drug List

-an added level of support-

Community Health Options partners with providers and employers to reduce your healthcare costs by giving you tools to help you stay healthy and productive.

Below is a list of prescription drugs that help protect against or manage some medical conditions. Taking these prescription drugs as directed by your provider can help avoid serious health problems. That may mean fewer provider visits and hospitalizations, reducing your total medical expenses. Prescription Drugs on this Preventive Drug list bypass the deductible, then the applicable coinsurance or copay will apply.

Note: This is a partial listing of prescription drugs and is subject to change. Please always refer to the current Health Options Drug Formulary at HealthOptions.org for a complete list of covered prescription drugs.
